At Bright Tomorrows Childcare Center we strive every day to provide our children with a safe, loving, nurturing environment, filled with lots of opportunities to learn about our world, to grow into strong, caring individuals, and to make lasting friendships and memories.

The staff at Bright Tomorrows Childcare Center takes pride in their job and strive to provide a fun, nurturing and safe environment for the children. All staff members are required to have training in CPR and First Aid and must participate in a minimum of eight hours of ongoing education in the areas of child development, classroom management and health and safety each year. Our Lead Teachers in our Preschool and Pre-Kindergarten classrooms have their bachelor’s degree and/or a state certification in either early childhood/elementary education.

At Bright Tomorrows, we believe communication with our families is one of the most important aspects of our job. Not only do teachers make themselves available to parents throughout the day, but we also provide parents with a complete record of your child’s day. We update our “Parent Information Board” regularly and distribute monthly newsletters with important information about upcoming events. We host PTA meetings and Parent/Teacher conferences to keep you informed about your child’s development.

We utilize a secure front door “card-slide” system. Identification cards are supplied to families upon enrollment. Only authorized personnel will be issued a card. The Safety and Security department at Hunterdon Medical Center monitors who comes in and exits the building and are ready to respond to any safety issues.
